

Closed Cell Foam Tires

made of polyurethane

Tires developed by
Amerityre® for WyseCarts

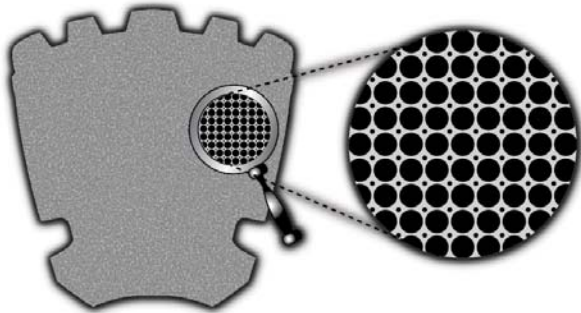

High abrasion resistance = longer life

True closed cell technology = no water absorption

High density material = excellent load capability

UV and ozone resistant = won't break down

Environmental friendly = recyclable

Closed Air Cells

make the difference

Our Wyse Tire is a good fit for
foodservice distribution companies.

These are non-marking tires
that don't absorb water.
